

Special Investigation Department
Attention: Cats fraud case
Osaka District Public Prosecutor's Office
1-1-60, Fukushima, Fukushima-ku,
Osaka, JAPAN

Dear Osaka Public Prosecutor,

We are deeply concerned about the case that happened and was discovered in November 2004 when a woman, the defendant, deceived 9 individual volunteers fostering stray cats and took at least 17 cats from these volunteers within just two and a half months. This is a serious crime neglecting precious lives and deceiving honest people who dedicate themselves to rescue stray cats that consequently bring great benefits to our society. Before the volunteers decided to deliver cats to the defendant, the defendant made a promise to each volunteer that the defendant would take good care of each cat and would send reports of the adopted cats frequently after the adoption. We interpret these promises as adoption fees to adopt each cat instead of paying actual amount of money to the volunteers. Thus, the defendant is responsible for the lives of those 17 cats, and she must return all cats immediately to the complainants because she completely failed to pay the fees for cats. At this point, there is no clue to determine whether those 17 cats are still alive and where those cats were placed because the defendant never answered to the volunteers once she obtained the cats. Moreover, the defendant recently moved and changed her contact information. Therefore, the volunteers are helpless without your professional help. The volunteers only care about their fostered cats and the safe return of the cats.

With our signatures on this form, we implore Osaka District Public Prosecutor's Office both to conduct further investigation immediately on this atrocity in order to find those 17 cats and to inflict a severe punishment on the defendant in order to stop and prevent such a heartless crime in the future.
